

On-Line Resources for Neuroscience Education

BrainU: Neuroscience resources for teachers and their students

<http://brainu.org>

Resources and activities, organized around grade level. Includes detailed classroom activities as well as lesson plans.

Neuroscience for Kids

<https://faculty.washington.edu/chudler/neurok.html>

Experiments, activities and games to help you learn about the nervous system. Developed as a labor of love by a faculty member at the University of Washington.

DANA Foundation

<http://www.dana.org/educators/lessons/>

Lessons and activities across all age levels. The Dana Foundation is a private organization that supports brain research and education through grants, publications, and educational programs. They are the organization behind [Brain Awareness Week](#) which occurs annually in the second week of March.

BrainFacts.org

<http://www.brainfacts.org>

An educational resource site organized by the [Society for Neuroscience](#). A wealth of educational material, much directed at research. Includes the [Essential Principles of Neuroscience](#): Each essential principle is supported by fundamental concepts comparable to those underlying the U.S. Next Generation Science Standards (NGSS).
